**Line 330 - Unfulfilled Broadband Service Request Resolution**

**Kentucky – SAC 265061**

Cincinnati Bell Telephone (“CBT”) determined the number of unfulfilled broadband service requests based on on-line inquiries and calls to a service representative regarding the availability of broadband service at a particular location. Those who inquired and asked to be notified when broadband service of 10 Mbps or greater became available at their location were considered as unfulfilled requests. CBT maintains a list of these unfulfilled requests. As CBT expands the reach of its broadband network it notifies customers in a newly served area when its broadband service becomes available. Of the unfulfilled requests reported on Line 320, 51 have subsequently subscribed to CBT’s broadband service.

**Service Quality Standards & Consumer Protection Rules Compliance**  
**Kentucky – SAC 265061**

Service Quality Standards

CBT has established procedures to ensure compliance with applicable service quality standards established by the state utility commissions and the FCC.

Consumer Protection Rules

CBT has procedures and processes in place to ensure compliance with applicable consumer protection rules, including, but not limited to: protection of CPNI as documented in its annual CPNI certification filed in EB Docket No. 06-36; FCC's Truth-in-Billing rules (47 C.F.R. § 64.2400 *et al*); Telemarketing rules (47 C.F.R. §64.1200 *et al*); Slamming rules (47 C.F.R. §64.1100 *et al*); Open Internet rules (47 C.F.R. §8.1 *et al*), and CVAA requirements (47 C.F.R. Parts 6, 7 and 14). CBT also has processes and procedures in place to address consumer complaints filed with the state utility commissions as well as complaints filed under section 208 of the Communications Act in compliance with 47 C.F.R. §§1.711 through 1.736. In addition, CBT provides 911 service throughout its service area.

**Functionality in Emergency Situations**  
**Kentucky – SAC 265061**

**807 KAR 5:061**

**Section 24. Emergency Operations**

(1) Each telephone utility shall have a written plan to meet service emergencies resulting from failures of power service, sudden and prolonged increase in traffic, fire, storm, or acts of God. Each telephone utility shall train employees in procedure to be followed in an emergency.

(2) All central offices and toll centers shall adequately provide for emergency power. Each central and/or toll office shall have a minimum of four (4) hours of battery reserve. In exchanges exceeding 5,000 lines and in toll offices, a permanent auxiliary power unit shall be installed. In offices without installed emergency power facilities there shall be a mobile power unit available of suitable capacity which can be delivered and connected within two (2) hours, or one-half (1/2) the battery reserve time, whichever is greater.

**Review of CBT KY Facilities and Processes to Remain Functional in Emergency Situations**

CBT has processes and procedures in place to comply with the requirements 807 KAR 5:061 Section 24, including the following:

**Batteries and Generators**

All CO's (and critical ORM's) have appropriately sized generators to carry and hold the CO's for at least 18 to 24 hours and also have wet cell batteries sized to provide 6 to 8-hours of back-up power for all telecom equipment. All ORMs have wet cell batteries sized for 6 to 8-hours of back-up power and approximately 25% of the ORM building portfolio has back-up generators installed on-site. All bulk power sites (CEV's, CEC, hut and cabinets, etc.) have 7-year warranty batteries with 6-8 hours of battery back-up power. All SLC sites have 5-year warranty batteries. Finally, CBT has portable generators within the network that can be marshaled to a site if an on-site generator fails or a site without a generator needs to ride-out an emergency situation.

**Diverse Facilities**

CBT has circuit redundancy and route diversification built into the landline Network for all class 5 Central Offices, including Lucent 5E and Nortel DMS10 offices, as well as SS7 diversification and a robust optical SONET Transport Network. However, if/when a network outage does occur, as in the case of a cable/fiber cut that isolates segments of the Landline Network, the Network Operation Center, which monitors the entire CBT Network, is able to quickly identify the outage condition, prioritize restoration efforts, including critical circuits/customers affected, and work with other internal groups to determine alternate routing that may be required to restore service and maintain traffic flow. Specifically, the NOC first utilizes TIRKS to determine if spare cable/fiber pairs are available to roll the affected circuits. If so, the NOC works with the Central Office technicians and cable maintenance crews to utilize the spare facilities. If spare facilities are not available, the NOC then works with the planning engineering group, as well as the facilities design group to re-design the cable/fiber routes. The NOC is a 24X7 operation,

and utilizes documented callout personnel from various internal departments as necessary during off hours to ensure facilities and network traffic are re-routed as soon as possible. The Cincinnati Bell NOC acts as a Control Center during network outages and communicates progress internally during restoration efforts, including facility routing. In the case of a catastrophic network event, emergency policies/procedures are also implemented and restoration efforts are coordinated with the Disaster Recovery Team.

#### **Congestion Management of Traffic Spikes**

CBT manages network congestion resulting from emergency situations using a number of techniques including the use of call gapping and line load control features. In addition, if necessary CBT may be able access spare capacity in some areas to relieve traffic spikes resulting from emergency situations.

**Cincinnati Bell Telephone Company LLC**  
**Description of Voice Services Rate Comparability**  
**Kentucky – SAC 265061**

As shown on the attached file for Line 700 (Company Voice Telephony Service Price Offerings), Cincinnati Bell Telephone Company LLC's ("CBT") highest rate for voice service (excluding the federal SLC) in Kentucky is \$30.75. CBT's federal SLC is \$5.31. Therefore the highest rate for voice service (local rate plus federal SLC) in CBT's Kentucky study area is \$36.06, which is below the "reasonable comparability benchmark" of \$41.07.

**Cincinnati Bell Telephone Company LLC**  
**Description of Broadband Services Rate Comparability**  
**Kentucky – SAC 265061**

As shown on the attached file for Line 710 (Company Broadband Price Offerings), Cincinnati Bell Telephone Company LLC (“CBT”) has a single non-promotional rate throughout its service area for each broadband speed tier; therefore, the rate in rural areas is the same as the rate urban areas. In addition, none of CBT’s broadband offerings have a usage allowance and the rates for all of CBT’s speed tiers are below the reasonable comparability benchmarks set by the FCC.

Cincinnati Bell Telephone Company LLC

Customers who purchase local measured service pay \$0.03 per originating minute of use for all local calls. Measured service customers may receive an unlimited number of calls for no additional charge. (See CBT's Exchange Rate Tariff, PSCK No. 2 at [www.cincinnati-bell.com](http://www.cincinnati-bell.com) for detail regarding CBT's local exchange services.)
